

INPUT = from LLs, tenant generated data (photos), from advocates...

forms / documentation / photos
(ex: receipt for payment; lease)

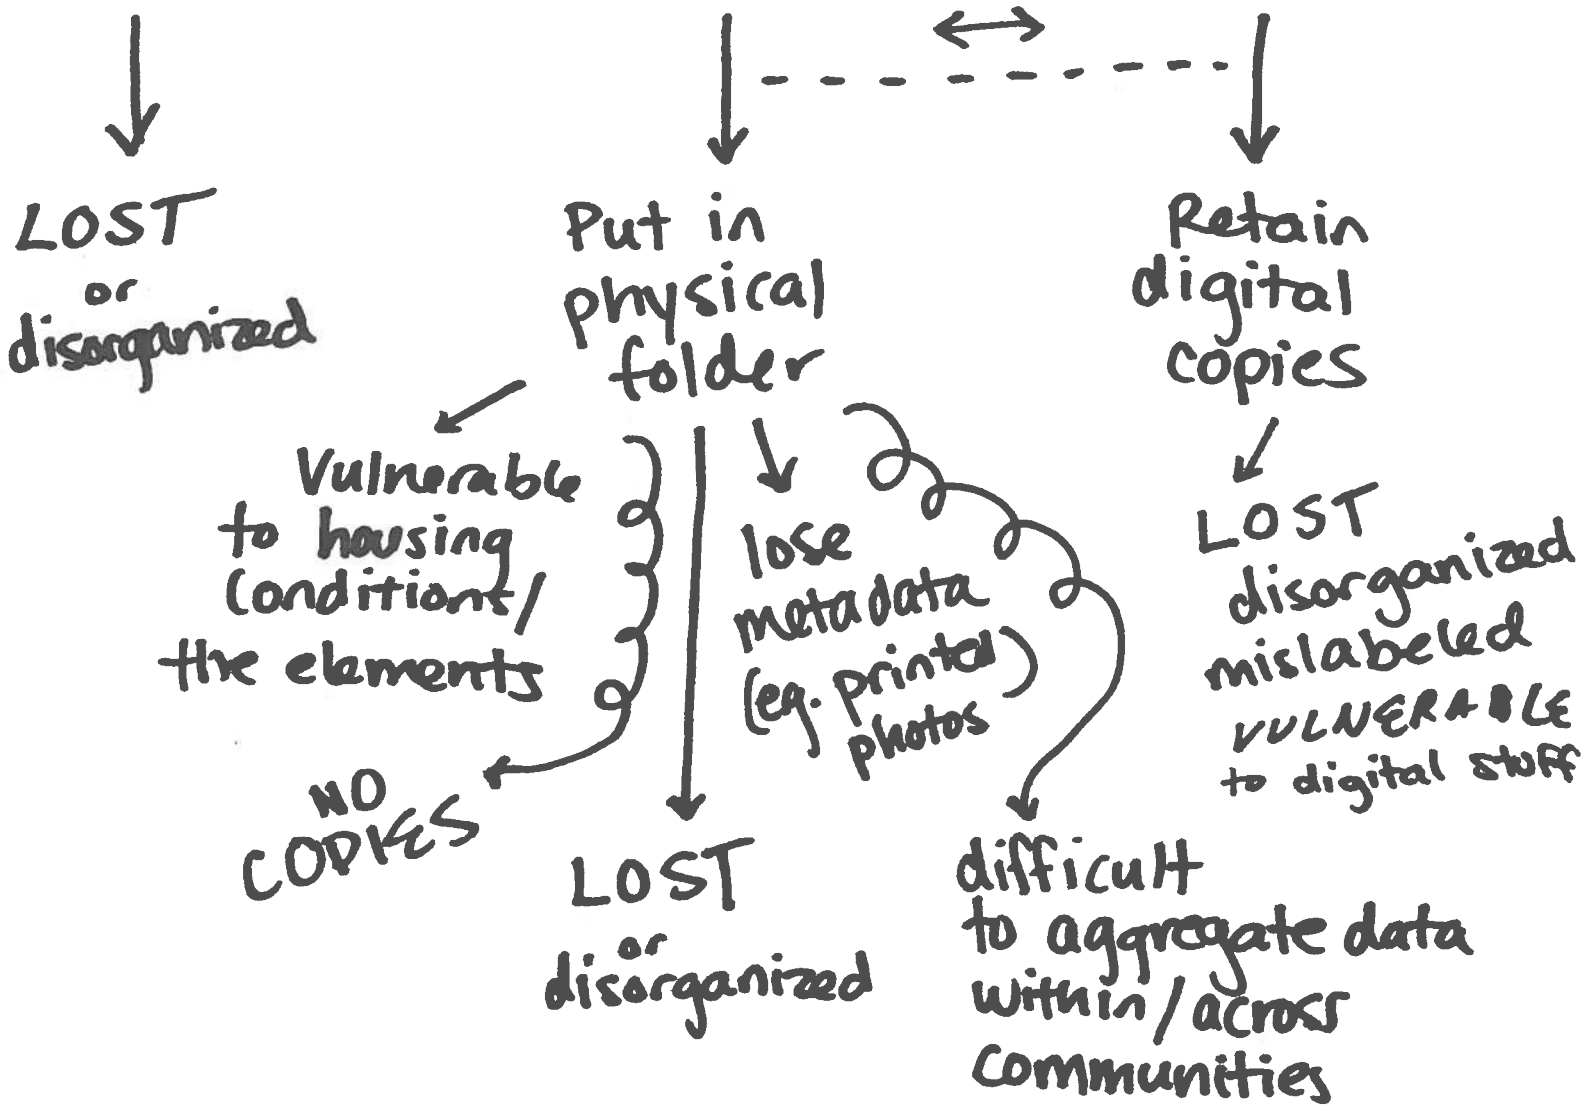

fig. 1

THE PROBLEM

- affects both tenants + advocates -

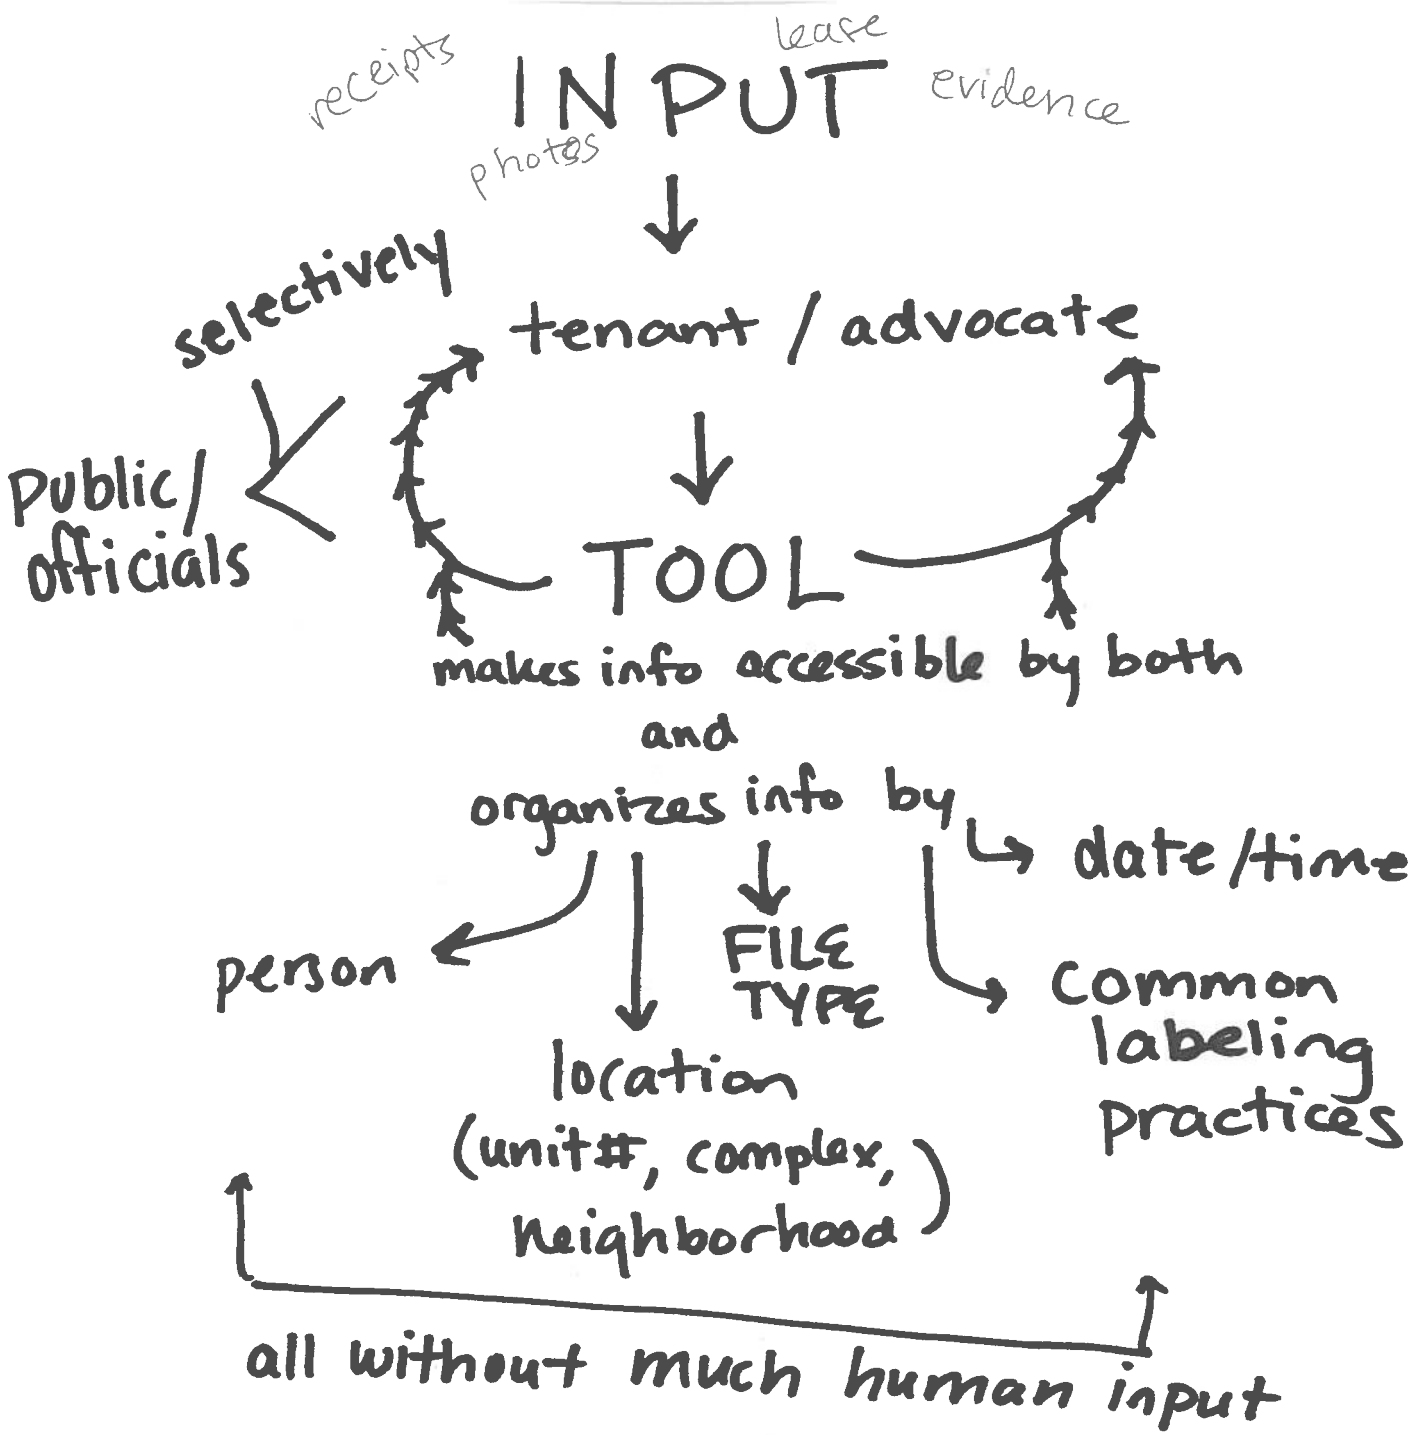

fig.2 THE (A?) SOLUTION

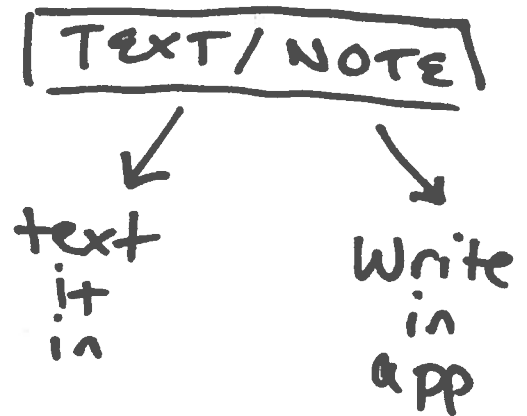

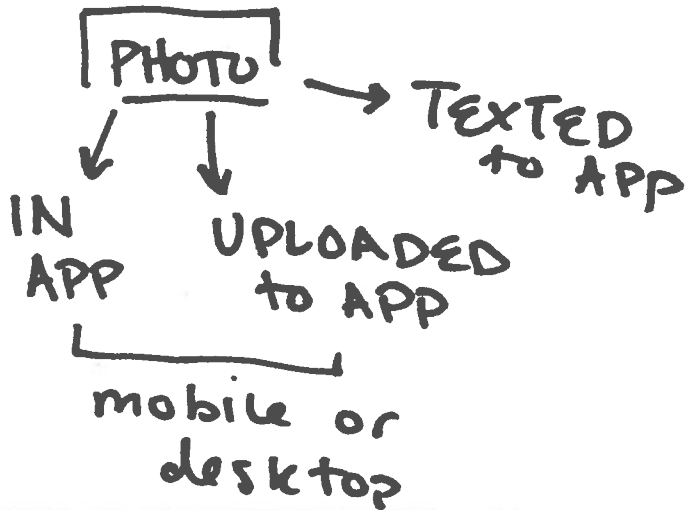

WHAT is "INPUT" + Why?

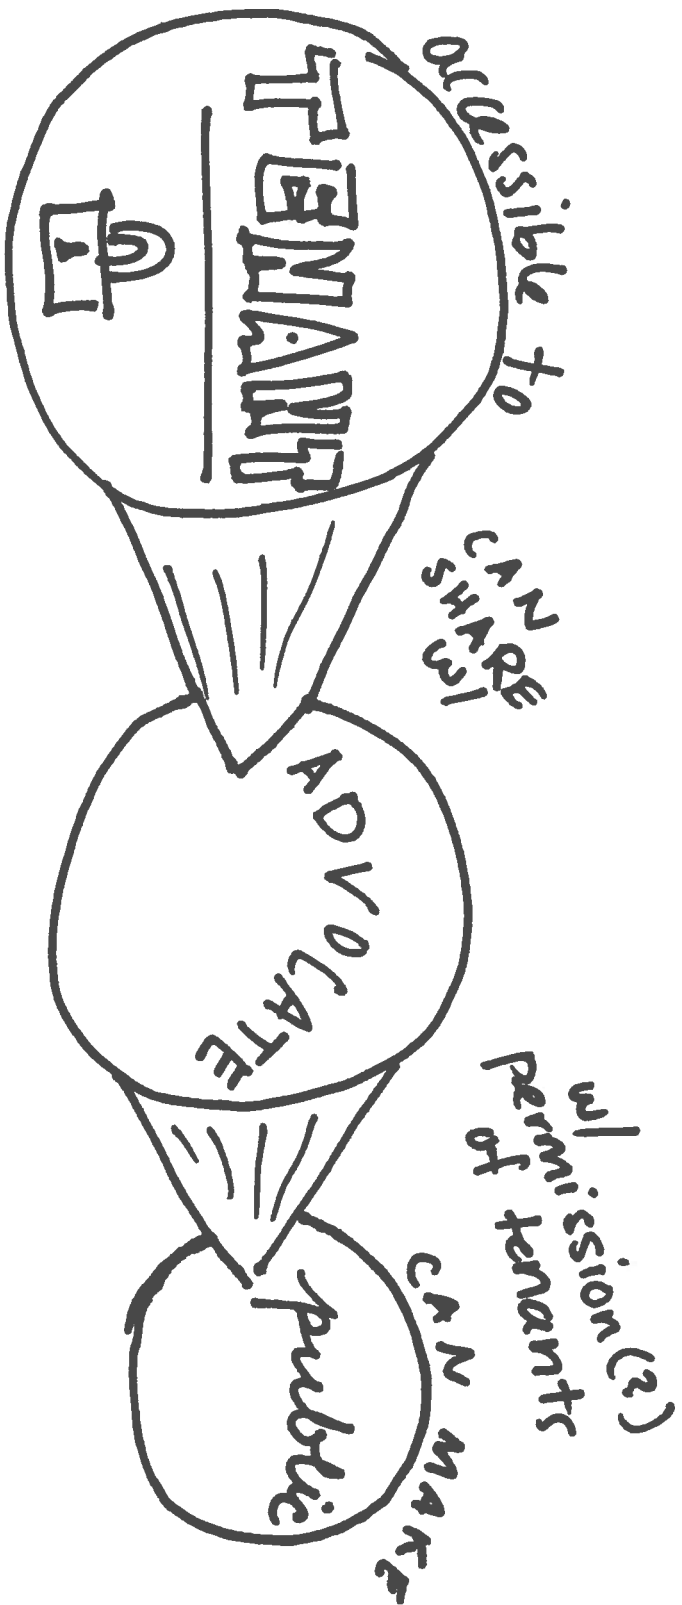

- photos
- copy of a lease
- receipts
- notes from LL
- bogus fees/fines

WE NEED a RECORD because...

- Useful in a legal sense - evidence for a lawsuit
- ^{helpful w/} Public advocacy → use bad conditions or absurd lease clauses to rile folks up!
- We can advocate to politicians; they can intervene in a case or change policy in response
- Analyze trends — spatial + temporal

how DOES it GET IN?

Security + privacy
will be v. important here

bells + whistles

> generate forms / complaints

- written repair requests
- code complaints

> integration with other datasets

- TCAD
- census

> to-do lists / reminders / nudges

- advocate could push tasks (for legal deadlines)
